DESCRIPTION:

Cedarlane's anti-mouse CD134L (OX40L) (CD252) monoclonal antibody reacts with a type II membrane protein that is similar to TNF that is found on activated antigen presenting cells (APC's) including B cells, dendritic cells and macrophages. CD134L mRNA is expressed in various mouse tissues including brain, skeletal muscle, kidney and spleen. This clone (OX-89) has been shown to impede T cell activation in the MLN and inhibit the development of colitis when used *in vivo*. CD134L is the ligand for CD134/OX40, and CD134/CD134L interactions are required for optimal B cell responses.

This clone is suitable for use in flow cytometry, immunohistochemistry (frozen sections) and functional assays.

PRESENTATION:

Purified: Purified IgG buffered in PBS and 0.02% NaN₃. (Purified from ascitic fluid via Protein G Chromatography).

Biotin, FITC and PE: Biotin/FITC/PE conjugated IgG buffered in PBS, 0.02% NaN₃ and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/mL.

No Azide: Purified Ig buffered in PBS, no preservative, 0.2 μm sterile filtered.

STORAGE/STABILITY:

For all formats, store at 4°C. DO NOT FREEZE PE conjugates. For long term storage (**Purified, Biotin, FITC, No Azide**), aliquot and freeze unused portion at -20°C in volumes appropriate for single usage. Avoid freeze/thaw cycles.
