Isotype: Rat IgG<sub>2b</sub>

**DESCRIPTION:**

Cedarlane's anti-mouse Gr-1 monoclonal antibody reacts with the myeloid differentiation antigen Gr-1. (1,2). This 25-30 kDa cell surface antigen is expressed on myeloid cells but not lymphoid or erythroid cells. The expression of the Gr-1 antigen increases with granulocyte maturation (3) as shown by the distinct populations of bone-marrow cells this monoclonal antibody labels: negative, low positive and high positive. Expression is transient on cells of monocytic lineage (3).

CL8991 is a useful antibody for studies of myeloid differentiation stages and their regulations by cytokines. Applications include flow cytometry (1,2,3) complement-mediated depletion (4) Western blot staining (5) and both frozen and paraffin sections (6).

**PRESENTATION:**

**Ascites:** Lyophilized

**Purified:** Purified IgG buffered in PBS and 0.02% NaN<sub>3</sub>. (Purified from ascitic fluid via Protein G Chromatography). For maximum recovery of contents, spin down tube before use.

**APC, Biotin, FITC, PE and AF488:** Biotin/FITC/PE/AF488 conjugated IgG buffered in PBS, 0.02% NaN<sub>3</sub> and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml.

**No Azide:** Purified Ig buffered in PBS, no preservative, 0.2µm sterile filtered.

**STORAGE/STABILITY:**

Store **Ascites** at -20°C. For all other formats, store at 4°C. **DO NOT FREEZE APC, PE and AF488** conjugates. For long term storage (**Purified, Biotin** and **FITC**), aliquot and freeze unused portion at -20°C in volumes appropriate for single usage. Avoid freeze/thaw cycles.

Visit our website for your local distributor.

## **SPECIFICATIONS:**

Clone: RB6-8C5

Immunogen: granulocytes of mouse origin

Specificity: Mouse Gr-1

Strains Tested: BALB/c, C57BL/6, CBA, C3H/He, AKR

Positive: BALB/c, C57BL/6, CBA, C3H/He, AKR

Negative: None

## **TEST RESULTS:**

Tissue Distribution by Flow Cytometry Analysis:

Mouse Strain: BALB/c

Cell Concentration:  $1 \times 10^6$  cells per test

Antibody Concentration Used:  $0.2 \mu\text{g}/10^6$  cells

Cell Source

Percentage of cells stained above control:

Thymus	2.0%
Whole Blood Monocytes	79.1%
Bone Marrow Macrophages	87.5%

Balb/c mouse bone marrow (high SSC population) was stained with anti-Granulocytes (Gr-1) (clone: RB6-8C5) (filled histogram) or rat IgG2b isotype control (open histogram).

**N.B. Appropriate control samples should always be included in any labeling studies.**

**\* For optimal results in various applications, it is recommended that each investigator determine dilutions appropriate for individual use.**
