Biotin Hamster IgG Isotypic Control

CLCHM15

LOT: 02020303

DESCRIPTION: Biotin Hamster IgG isotypic control

VOLUME: 0.5 ml

ANTIBODY CONTENT: 50 µg

APPLICATIONS: This isotype control is provided in liquid format for application in flow cytometry. 1 µg is the maximum amount of reagent required for 1×10^6 cells in flow cytometry. Lesser amounts of reagent may be sufficient and it is recommended that the customer determine the optimum amount of antibody for each application. When using isotype controls as negative controls, it is recommended that the amount of isotype control and the testing antibody used be equivalent.

BUFFERS & PRESERVATIVES: This reagent is provided in phosphate buffered saline and contains 0.1% sodium azide (NaN_3). A highly purified grade of BSA was added as a stabilizing protein to bring the final protein concentration to 4-5 mg/ml after conjugation.

STORAGE/STABILITY: Stable at 4°C. For long term storage, aliquot and freeze unused portions at -20°C in volumes appropriate for single usage. Avoid repeated freeze/thaw cycles. If the reagent is being diluted, it is recommended that only the quantity to be used within one week be diluted. Check label for expiry date.

FOR RESEARCH USE ONLY
