Purified Mouse IgG₁ Isotypic Control

CLCMG100

LOT:

DESCRIPTION: Purified Mouse IgG₁ isotypic control

VOLUME: 0.5 ml

ANTIBODY CONTENT: 50 µg

APPLICATION:

Each lot is tested in flow cytometry using freshly harvested mouse splenocytes and/or human peripheral blood lymphocytes (PBL). From this testing, it is recommended that 10 µl is the maximum amount of reagent required for 1x10⁶ cells. Lesser amounts of reagent may be sufficient and it is recommended that the customer determine the optimum amount for each application. When using isotype controls as negative controls, it is recommended that the amount of isotype control and the testing antibody used be equivalent.

BUFFERS & PRESERVATIVE:

This reagent is provided in phosphate buffered saline solution, pH 7.2 and contains 0.02% sodium azide (NaN₃).

STORAGE/STABILITY:

Stable at 4°C. For long term storage, aliquot and freeze unused portions at -20°C in volumes appropriate for single usage. Avoid repeated freeze/thaw cycles. If the reagent is being diluted, it is recommended that only the quantity to be used within one week be diluted.

Laboratory Reagent For Research Use Only
