## PE-Cy7 Mouse IgG<sub>1</sub> Isotypic Control

**CLCMG112**  
**LOT:** 13120808

**DESCRIPTION:** PE-Cy7 Mouse IgG<sub>1</sub> isotypic control

**VOLUME:** 0.5 ml

**ANTIBODY CONTENT:** 50 µg

**APPLICATION:**

This isotype control is provided in liquid form for use in flow cytometry. 10ul is the maximum amount of reagent required for 10<sup>6</sup> cells. Lesser amounts of reagent may be sufficient and it is recommended that the customer determine the optimum amount for each application. This conjugate excites at 488 nm. The peak emission is 767 nm. When using isotype controls as negative controls, it is recommended that the amount of isotype control and the testing antibody used be equivalent.

**BUFFERS & PRESERVATIVE:**

This reagent is presented in phosphate buffered saline (PBS) and contains 0.1% sodium azide (NaN<sub>3</sub>) as a preservative. A highly purified grade of BSA has been added as a stabilizing protein to bring the final concentration to 4-5 mg/ml after conjugation.

**STORAGE/STABILITY:**

Stable at 4°C. **DO NOT FREEZE.** If the reagent is being diluted, it is recommended that only the quantity to be used within one week be diluted. Exposure to light should be avoided.

**FOR RESEARCH USE ONLY**

MW 08/12/08
