Biotin Mouse IgG_{1κ} Isotypic Control

CLCMG115

DESCRIPTION: Biotin Mouse IgG₁ isotypic control

VOLUME: 0.5 ml

ANTIBODY CONTENT: 50 µg

APPLICATION:

This isotypic control is provided in liquid form for use in flow cytometry. 10 µl is the maximum amount of reagent required for 1x10⁶ cells. Lesser amounts of reagent may be sufficient and it is recommended that the customer determine the optimum amount for each application. When using isotype controls as negative controls, it is recommended that the amount of isotype control and the testing antibody used be equivalent.

BUFFERS & PRESERVATIVE:

This reagent is presented in phosphate buffered saline (PBS) and contains 0.1% sodium azide (NaN₃) as a preservative. A highly purified grade of BSA has been added as a stabilizing protein to bring the final concentration to 4-5mg/ml after conjugation.

STORAGE/STABILITY:

Stable at 4°C. For long term storage, aliquot and freeze unused portions at -20°C in volumes appropriate for single use. Avoid repeated freeze/thaw cycles. If the reagent is being diluted, it is recommended that only the quantity to be used within one week be diluted.

FOR RESEARCH USE ONLY
