## Purified Mouse Anti-Human Adrenocorticotrophic Hormone (ACTH) Monoclonal Antibody

CLSG36505  
CLSG36505-05  
Lot:

- Immunogen:** BALB/C mice were injected with a synthetic peptide corresponding to amino acids 1-24 from the N-terminal of human ACTH.
- Clone:** AH26
- Isotype:** IgG1
- Format:** 1 ml (CLSG36505) or 0.5 ml (CLSG36505-05). This antibody is supplied as purified immunoglobulin fraction containing sodium azide as preservative.
- Titer/Working Dilution:** This antibody may be diluted to a titer of 1:50-1:100 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.
- Staining Protocol:** We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation should be determined by the user. Suitable for formalin/paraffin tissues.
- Specificity:** This antibody is specific to an epitope on the N-terminus of ACTH. This antibody stains corticotrophs in the adenohypophysis. It labels corticotrophs in adenohypophysis and is useful in the classification of pituitary adenomas.
- Positive Control:** Pituitary
- Cellular Localization:** Cytoplasmic
- Storage:** Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.

**Laboratory Reagent For Research Use Only**
