Mouse anti-Human bcl-2 Oncoprotein Monoclonal Antibody

CLSG36521
CLSG36521-05
Lot:

Immunogen: BALB/C mice were injected with synthetic bcl-2 peptide.

Clone: 100/D5

Isotype: IgG1

Format: 1 ml (**CLSG36521**), or 0.5 ml (**CLSG36521-05**). This antibody is supplied as purified immunoglobulin containing sodium azide as a preservative.

Titer/Working Dilution: This antibody may be diluted to a titer of 1:25-1:50 in an ABC method. The final dilution should be determined by the user based upon the staining conditions employed.

Specificity: The bcl-2 product is considered to act as an inhibitor of apoptosis. bcl-2 expression is inhibited in germinal centers where apoptosis forms part of the B cell production pathway. Reactive follicles show no staining for bcl-2, where as cells in neoplastic follicles exhibit membrane staining.

Positive Control: Tonsil

Cellular Localization: Cell membrane

Storage: Store at 2-8°C. Do not use beyond the expiration date stated on the label.
