Mouse Anti-Human Granulocyte Associated Antigen, CD15 Monoclonal Antibody

CLSG36566

Lot:

Immunogen:

Purified neutrophils from normal human peripheral blood.

Clone:

MY-1

Isotype:

IgM, Kappa

Format:

1 ml. This antibody is supplied as tissue culture supernatant containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:15-1:25 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation should be determined by the user. Suitable for formalin/paraffin tissues.

Specificity:

The specificity of this antibody is similar to antibodies Leu-M1, TÛ 9 and VIM-D5, recognizing an epitope involving the carbohydrate sequence 3-fucosyl-N-acetylacetosamine. This antibody reacts with an antigen located on mature granulocytes and on Hodgkin and Reed-Sternberg cells.

Positive Control:

Tonsil

Cellular Localization:

Cell membrane

Storage:

Store the antibody at 4-8° C. Do not use it beyond the expiration date stated on the label.
