Mouse Anti-Heat Shock Protein 70 (HSP70)

CLSG36737

Lot:

Description:

This monoclonal antibody is specific to constitutive (HSP73) and inducible (HSP72) forms of HSP70. HSP70 is found to be associated with steroid receptors, actin, p53, polyoma T antigen, nucleotides and other known proteins. HSP70 has been shown to be involved in protective role against thermal stress, cytotoxic drugs and other damaging conditions.

Presentation:

1 ml, purified immunoglobulin fraction containing 0.05% sodium azide (NaN₃) as a preservative.

Immunogen:

BALB/C mice were injected with recombinant HSP 70 protein.

Isotype:

Mouse IgG_{2a}

Clone:

W27

Applications:

This antibody is suitable for use in immunohistochemistry. We recommend a starting dilution of 1:25 – 1:100 for use with an ABC method, with an incubation period of 30 minutes at room temperature. Formalin-fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10mM citrate buffer, pH 6.0 prior to immunostaining. For optimal results in various applications, it is recommended that each investigator determine dilutions and incubation period appropriate for individual use.

Positive Control:

Breast carcinoma

Cellular Localization: Cytoplasmic and Nuclear

Storage:

4°C. Check label for expiry date.

FOR RESEARCH USE ONLY
