## Purified Rabbit Anti-Human Chromogranin A

**CLSG36919**

**Lot:**

**Description:** This rabbit polyclonal antibody reacts with human chromogranin A in neuroendocrine cells and neural tissues. It does not recognize the epitopes located on the N-terminal half of the chromogranin A molecule.

**Presentation:** 1ml, purified immunoglobulin fraction of rabbit antiserum against human chromogranin A, containing sodium azide ( $\text{NaN}_3$ ) as a preservative.

**Immunogen:** C-terminal half of chromogranin A was purified from urine of patients with carcinoid syndrome.

**Application:** This antibody is suitable for use in immunohistochemistry. We recommend a starting dilution of 1:25 – 1:50 for use with an ABC method, and an incubation period of 30 minutes at room temperature. Formalin-fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10mM citrate buffer, pH 6.0 prior to immunostaining.

For optimal results in various applications, it is recommended that each investigator determine dilutions and incubation period appropriate for individual use.

**Positive Control:** Pancreas

**Cellular Localization:** Cytoplasmic

**Storage:** 4°C. Check label for expiry date.
