Rabbit Anti-Human Gastrin Polyclonal Antibody

CLSG36936

CLSG36936-05

Lot:

Immunogen:

Recombinant Gastrin conjugated to KLH.

Host:

Rabbit

Format:

1 ml (CLSG36936) or 0.5 ml (CLSG36936-05), whole rabbit antiserum against gastrin containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:50-1:100 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Suitable for formalin/paraffin tissues.

Specificity:

The antibody is specific against gastrin-containing cells. This antibody reacts with human gastrin I and human gastrin I fragments. No cross reactivity was observed with rat gastrin, human big gastrin, human gastrin releasing peptide, sulfated cholecystokinin amide, non-sulfated cholecystokinin amide and cholecystokinin.

Positive Control:

Stomach

Cellular Localization:

Cytoplasmic

Storage:

Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.
