Purified Rabbit anti-Human IgD Polyclonal Antibody

CLSG36949, CLSG36949-05

Lot:

Immunogen:

IgD isolated from a pool of normal human plasma.

Host:

Rabbit

Format:

1 ml (CLSG36949) or 0.5 ml (CLSG36949-05) affinity purified immunoglobulin fraction of rabbit antiserum against human IgD containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:40-1:100 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Proteolytic treatment is required prior to immunostaining of formalin fixed paraffin embedded tissue sections.

Specificity:

This antibody reacts with the delta chain of human IgD. Traces of contaminating antibodies have been removed by solid phase absorption. Only the IgD arch appeared in crossed immunoelectrophoresis.

Positive Control:

Tonsil

Cellular Localization:

Cytoplasmic

Storage:

Store the antibody at 2-8° c. Do not use it beyond the expiration date stated on the label.

For Research Use Only. Not for Diagnostic or Therapeutic Work.

JJ 01/08/07
