Rabbit anti-Myelin Basic Protein Polyclonal Antibody

CLSG36964
CLSG36964-05
Lot:

Immunogen:	Human myelin basic protein isolated from normal human brain.
Host:	Rabbit
Format:	1 ml (CLSG36964) or 0.5 ml (CLSG36964-05). Purified immunoglobulin fraction of rabbit antiserum against human MBP containing sodium azide as a preservative.
Titer/Working Dilution:	This antibody may be diluted to a titer of 1:20-1:40. This antibody is optimized with 2 step DBS PolyVue plus polymer detection system. The final dilution should be determined by the user based upon the staining conditions employed.
Staining Protocol:	We suggest an incubation period of 30 minutes at room temperature. Optimal incubation conditions should be determined by the user based upon the fixation conditions and staining system employed. Suitable for formalin fixed, paraffin embedded tissue sections. No antigen retrieval is required.
Specificity:	This antibody reacts with human myelin basic protein and oligodendrocytes of white matter in the brain and spinal cord. Grey matter stains weakly. It also stains peripheral nerves.
Positive Control:	Brain
Cellular Localization:	The cellular staining pattern for anti-MBP is cytoplasmic, membrane and/or nuclear.
Storage:	Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.
