Purified Rabbit anti-Somatostatin Receptor

CLSG36986

Lot:

Immunogen:

A synthetic peptide derived from the C-terminus of rat somatostatin protein.

Host:

Rabbit

Format:

Purified immunoglobulin fraction of rabbit antiserum against human somatostatin receptor containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:50-1:75 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Formalin fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10 mM citrate buffer, pH 6.0 prior to immunostaining.

Specificity:	This antibody reacts with a 60 kD protein, known as somatostatin receptor. Somatostatin family of receptors has five members, sst1-sst5, as well as two isoforms of somatostatin receptor 2, sst2A and sst2B. They are coupled to G protein and are involved in regulation of numerous processes including secretion of insulin, glucagons and growth hormone and excitation of neurons in central and peripheral nervous system. This antibody cross-reacts with mouse and rat.
Positive Control:	Pancreas
Cellular Localization:	Cytoplasmic
Storage:	Store the antibody at 4-8 ^o C. Do not use it beyond the expiration date stated on the label.
