

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!

## GFH151 Recombinant Human IL-32 $\alpha$

### Description

Interleukin-32  $\alpha$  (IL-32  $\alpha$ ) is one of six known splice variants of the IL-32 gene. IL-32  $\alpha$  induces the macrophage production of inflammatory cytokines, such as interleukin-8 (IL-8), Tumor Necrosis Factor  $\alpha$  (TNF- $\alpha$ ), and Macrophage Inflammatory Protein 2 (MIP-2). IL-32  $\alpha$  expression is increased after the activation of T cells, Natural Killer (NK) cells, and interferon  $\gamma$ -treated epithelial cells.

<b>Length</b>	141 aa
<b>Molecular Weight</b>	15.7 kDa
<b>Source</b>	E. coli
<b>Accession Number</b>	Q6EAL8
<b>Purity</b>	$\geq$ 95% determined by reducing and non-reducing SDS-PAGE

### Specifications

<b>Alternative Names</b>	Interleukin-31, interleukin 31, IL31, IL 31
<b>Biological Activity</b>	Human IL-32 $\alpha$ is fully biologically active when compared to standard. The activity is determined by the induced production of TNF- $\alpha$ from human PBMC cells.
<b>Endotoxin Level</b>	$\leq$ 1.00 EU/ $\mu$ g as measured by kinetic LAL
<b>Formulation</b>	Lyophilized from a sterile (0.2 micron) filtered aqueous solution containing 10 mM sodium phosphate, pH 7.5
<b>AA Sequence</b>	<pre> MTCSLSFGAP ISKEDLRRTI DLLKQESQDL YNNYSIKQAS GMSADESIQL PCFSLDREAL TNISVIAHL EKVKVLSNT VDTSWVIRWL TNISCFNPLN LNISVPGNTD ESYDCKVFVL TVLKQFSNCM AELQAKDNTT C           </pre>

### Preparation and Storage

<b>Reconstitution</b>	Centrifuge vial before opening. When reconstituting the product, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. It is recommended to reconstitute the lyophilized product with sterile water at 0.1 mg/ml, which can be further diluted into other aqueous solutions.
<b>Stability and Storage</b>	<p>12 months from date of receipt when stored at -20°C to -80°C as supplied.</p> <p>1 month when stored at 4°C after reconstituting as directed.</p> <p>3 months when stored at -20°C to -80°C after reconstituting as directed.</p>

### Data

Induced production of TNF- $\alpha$  from human PBMC cells for Human IL-32  $\alpha$ . Cell proliferation was measured to calculate the ED50.

Non-reducing (-) and reducing (+) conditions in a 4 - 20% Tris-Glycine gel stained with Coomassie Blue. 1  $\mu$ g of protein was loaded in each lane. Human IL-32  $\alpha$  has a predicted Mw of 14.9 kDa.
