## PPH318 PODS® Human Nodal

### Description

The product contains the polyhedrin protein co-crystalized with Human Nodal. Nodal is a member of the TGF-β superfamily and signals through two receptor complexes. Nodal induces both mesoderm and endoderm and participate in anterior-posterior positioning. Nodal also induces apoptosis in susceptible cell populations through ALK7.

Length 155 aa

Molecular Weight 18 kDa

**Source** Spodoptera frugiperda (Sf9) cell culture

Accession Number Q96S42

### **Usage Recommendation**

PODS® co-crystals provide a depot of proteins which are steadily secreted. It has been estimated that the biological activity of 50 million PODS® co-crystals generates the same peak dose as 3.3 µg of standard recombinant protein. However, at 5 days following the start of seeding the PODS® co-crystals, there are more than 50% of these peak levels still present in the culture system. Ultimately, the amount of PODS® co-crystals that is optimal for a particular experiment should be determined empirically. Based on previous data, we suggest using 50 million PODS® co-crystals in place of 3.3 µg of standard growth factor as a starting point."To control for cross-reactivity with cells or as a negative control, we recommend using PODS® growth factors alongside <a href="http://www.cellgs.com/products/podsand8482-empty.html"> PODS® Empty crystals</a>, as the latter do not contain or release cargo protein.

### **Specifications**

Alternative Names BMP-16, MGC138230, nodal homolog (mouse)

**Endotoxin Level** <0.06 EU/ml as measured by gel clot LAL assay

**Formulation** PODS® were lyophilized from a volatile solution

AA Sequence MADVAGTSNR DFRGREQRLF NSEQYNYNNS KNSRPSTSLY KKAGFHHLPD RSQLCRKVKF

### **Preparation and Storage**

Reconstitution PODS® co-crystals may be reconstituted at 200 million co-crystals/ml in water. 20% glucose has a

buoyant density closer to PODS® co-crystals and can be useful for aliquoting.PODS® co-crystals are

highly stable when stored in aqueous solution (pH range 6 - 8).

Stability and Storage Upon receipt, store at 4°C. PODS® co-crystals are stable for at least 1 year when dry and 6 months

when resuspended.
