DATA SHEET

PPH353 PODS[®] Human Neurturin

Description

The product contains the polyhedrin protein co-crystalized with Human Neurturin. Neurturin is a member of the GDNF family, itself belonging to the TGF superfamily of proteins. Neurturin is a disulfide-like homodimer and shares 92% sequence identity with murine Neurturin. It supports the survival of neurons in culture, including sympathetic, sensory and CNS neurons. Furthermore, it may regulate the development and maintenance of the CNS.

Length	147 aa
Molecular Weight	33.8 kDa
Source	Spodoptera frugiperda (Sf9) cell culture
Accession Number	Q99748

Usage Recommendation

PODS[®] co-crystals provide a depot of proteins which are steadily secreted. It has been estimated that the biological activity of 50 million PODS[®] co-crystals generates the same peak dose as 3.3 µg of standard recombinant protein. However, at 5 days following the start of seeding the PODS[®] co-crystals, there are more than 50% of these peak levels still present in the culture system. Ultimately, the amount of PODS[®] co-crystals that is optimal for a particular experiment should be determined empirically. Based on previous data, we suggest using 50 million PODS[®] co-crystals in place of 3.3 µg of standard growth factor as a starting point. To control for cross-reactivity with cells or as a negative control, we recommend using PODS[®] growth factors alongside <u>PODS[®] Empty crystals</u>, as the latter do not contain or release cargo protein.

Specifications Alternative Names NTN, NRTN

Endotoxin Level	<0.06 EU/ml as measured by gel clot LAL assay
Formulation	PODS [®] were lyophilized from a volatile solution
AA Sequence	MADVAGTSNR DFRGREQRLF NSEQYNYNNS KNSRPSTSLY KKAGFARLGA RPCGLRELEV RVSELGLGYA SDETVLFRYC AGACEAAARV YDLGLRRLRQ RRRLRRERVR AQPCCRPTAY EDEVSFLDAH SRYHTVHELS ARECACV

Preparation and Storage

Reconstitution	PODS® co-crystals may be reconstituted at 200 million co-crystals/ml in sterile PBS. 20% glucose has a buoyant density closer to PODS® co-crystals and can be useful for aliquoting. PODS® co-crystals are highly stable when stored in aqueous solution (pH range 6 - 8).
Stability and Storage	Upon receipt, store at 4°C. PODS [®] co-crystals are stable for at least 1 year when dry and 6 months when resuspended.
