Recombinant Mouse C-type lectin domain family 4 member E(Clec4e), partial

Product Code CSB-EP870809MO Relevance C-type lectin that functions as cell-surface receptor for a wide variety of ligands such as damaged cells, fungl and mycobacteria. Plays a role in the recognition of pathogenic fungi, such as Candida albicians. The detection of mycobacteria is via trehalose 6,6'-dimycolate (TDM), a cell wall glycolipid. Specifically recognizes alpha-mannose residues on pathogenic fungi of the genus Malassezia. Recognizes also SAP130, a nuclear protein, that is released by dead or dying cells. Transduces signals through an ITAM-containing adapter protein, Fc receptor gamma chain /FCER1G, induces secretion of inflammatory cytokines through a pathway that depends on SYK, CARD9 and NF-kappa-B. Storage The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C. Uniprot No. Q9R0Q8 Alias C-type lectin superfamily member 9 Macrophage-inducible C-type lectin Product Type Recombinant Protein Immunogen Species Mus musculus (Mouse) Purity Greater than 90% as determined by SDS-PAGE. CUSABIO® Your good partner in biology research

CUSABIO TECHNOLOGY LLC

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
