Recombinant Human RAB5B protein (His tag)

Catalog Number:PDEH100307

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms	Ras-related protein Rab-5B;RAB5B
Species	Human
Expression Host	E.coli
Sequence	Met 1-Asn 215
Accession	P61020-1
Calculated Molecular Weight	23.5 kDa
Observed molecular weight	30 kDa
Tag	N-His & C-His

Properties

Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	Please contact us for more information.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01 % Tween80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Antisense inhibition of Rab5b, a gene coding for a small GTPase associated with endocytosis, significantly reduced the mGluR-mediated neuroprotection. Ras-related protein Rab-5B (RAB5B), which is identified by a genome-wide association study as a risk locus for this syndrome, encodes a small GTPase involved in the control of receptor internalization and early endosome fusion. Previous genome-wide sequencing revealed that RAB5B is a susceptible target in patients with polycystic ovary syndrome (PCOS). RAB5A gene was abnormally expressed in luteinized granulosa cells of obese patients with polycystic ovary syndrome, which may help explain high FSHR levels found in this syndrome. RAB5B is directly downregulated by miR-130a-3p. Knockdown of RAB5B also inhibited cell proliferation, migration, and invasion.
