Recombinant Rat GPRC6A protein (His tag)

Catalog Number:PDER100062

Note: Centrifuge before opening to ensure complete recovery of vial contents.

	% as determined by reducing SDS-PAGE.
	e contact us for more information.
-80°C	scally, lyophilized proteins are stable for up to 12 months when stored at -20 to C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots constituted samples are stable at < -20 °C for 3 months.
Shipping This j	product is provided as lyophilized powder which is shipped with ice packs.
Norm	hilized from sterile PBS, pH 7.4. hally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as ctants before lyophilization. he refer to the specific buffer information in the printed manual.
Reconstitution Please	e refer to the printed manual for detailed information.
Data	

>95 % as determined by reducing SDS-PAGE.

Background

Receptor activated by amino acids with a preference for basic amino acids such as L-Lys, L-Arg and L-ornithine but also by small and polar amino acids. The L-alpha amino acids respond is augmented by divalent cations Ca(2+) and Mg(2+). Activated by extracellular calcium and osteocalin. Seems to act through a G(q)/G(11) and G(i)-coupled pathway. Mediates the non-genomic effects of androgens in multiple tissue. May coordinates nutritionnal and hormonal anabolic signals through the sensing of extracellular amino acids, osteocalcin, divalents ions and its responsiveness to anabolic steroids.
