EB08792 - Goat Anti-APOB Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: APOB, apolipoprotein B (including Ag(x) antigen), FLDB, apoB-100, apolipoprotein B

Official Symbol: APOB

Accession Number(s): NP_000375.3

Human GeneID(s): [338](#)

Important Comments: This antibody only recognises ApoB-100 and not the cleaved chain ApoB-48.

Immunogen

Peptide with sequence C-TDLHLRYQKDKK, from the internal region of the protein sequence according to NP_000375.3.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Customer data showed a band corresponding to the expected size of ApoB-100 in Human serum samples from five different individuals (calculated Mwt of 515kDa according to NP_000375.3). The smaller bands shown are believed to be degradation products of ApoB-100 (not ApoB-48). Recommended concentration: 0.3-1µg/ml.

IHC: Paraffin embedded Human Liver and Small Intestine. Recommended concentration: 2µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB08792 (0.5µg/ml) staining of Human Serum lysates. Data kindly provided by Yan Xie and NO Davidson, Washington USA. This antibody showed background below 150kDa in serum samples.

EB08792 (2µg/ml) staining of paraffin embedded Human Liver. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

EB08792 (2µg/ml) staining of paraffin embedded Human Small Intestine. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
