EB09666 - Goat Anti-CXCL14 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: CXCL14, chemokine (C-X-C motif) ligand 14, BMAC, BRAK, KS1, Kec, MGC10687, MIP-2g, NJAC, SCYB14, bolekin, CXC chemokine in breast and kidney, small inducible cytokine B14, small inducible cytokine subfamily B (Cys-X-Cys), member 14 (BRAK)

Official Symbol: CXCL14

Accession Number(s): NP_004878.2

Human GeneID(s): [9547](#)

Non-Human GeneID(s): 57266 (mouse), 306748 (rat)

Immunogen

Peptide with sequence KSVSRYRGQEHCLH, from the internal region of the protein sequence according to NP_004878.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as small as the ligand derived from its precursor or the precursor itself with calculated size of 13.1kDa according to NP_004878.2. Therefore we cannot recommend an optimal concentration and the antibody is an aspiring product. We would appreciate any feedback from people in the field - have any assay results been reported with other antibodies?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow
