BrdU (bromodeoxyuridine). Sheep Polyclonal Antibody

BACKGROUND

Bromodeoxyuridine (BrdU) is a thymidine analog which is selectively incorporated into the DNA of proliferating cells to provide a marker for the DNA being replicated. The number of proliferating cells can then be detected in cell lysates, tissue sections or suspensions using an antibody specific for the BrdU. Previous methods of detecting DNA included the use of [³H]-thymidine which would be incorporated into the DNA and could then the DNA could be quantified by autoradiography or scintillation counting. These methods are more difficult and require more cleanup due to the radioactive material. An immunohistochemical assay provides a much simpler and cleaner method for detecting DNA in cells. This antibody is also useful for detecting proliferating cells by flow cytometry or immunofluorescence staining.

ORDERING INFORMATION

CATALOG NUMBER

A205P

SIZE

250 µg

FORM

Unconjugated

HOST/CLONE

Sheep

FORMULATION

Provided as solution in phosphate buffered saline with 0.08% sodium azide

CONCENTRATION

See vial for concentration

ISOTYPE

IgG

APPLICATIONS

Western Blot, Immunoprecipitation, Immunohistochemistry

SPECIES REACTIVITY

N/A

ACCESSION NUMBER

Not Applicable, Not Applicable

IMMUNOGEN

Bromodeoxyuridine conjugated to *Helix Pomatia* Haemocyanin.

Activity assay using BrdU antibody (Cat. No. A205P) against BrdU labeled BGG (left). Immunoprecipitation assay using BrdU antibody on BrdU, 5-methyl cytosine (5-Me) and control (No Ag).

POSITIVE CONTROL/TISSUE EXPRESSION

COMMENTS

Applications: Western blotting: 25 -100 µg/ml; Immunoprecipitation: 25-100 µg/ml; Immunohistochemistry: 25-100 µg/ml The antibody has been tested using immunoprecipitation against 5-methyl cytosine (5-MeC) and bromodeoxyuridine (BrdU) or a control (no antigen). At a concentration of 25 ug/ml, this product demonstrates 8-fold higher reactivity with 5-MeC versus BrdU. For best results, use product at 25-100µg/ml.
Note: Denature DNA sample first so that bases are accessible to anti BrdU antibody.

PURIFICATION

Ammonium Sulfate Precipitation

SHIP CONDITIONS

Room Temperature

STORAGE CUSTOMER

Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles

STABILITY

Products are stable for one year from purchase when stored properly
