**PTP  $\mu$ . Mouse Monoclonal Antibody**

**BACKGROUND**

PTP  $\mu$  is a receptor type protein tyrosine phosphatase which is composed of an extracellular sement containing a MAM domain, an immunoglobulin domain and four ibronectin type III repeats, a transmembrane segment and two intracellular PTP domains. PTP  $\mu$  is known to bind homolphilically, i.e., PTP  $\mu$  on one cell will bind to PTP  $\mu$  on another cell. Exalpa's PTP  $\mu$  monoclonal antibody, clone SBK15, was raised against a.a.s 42-60 of of PTP  $\mu$  coupled to KLH.
