Toll-like receptor 4 (TLR4) (NT). Rabbit Polyclonal Antibody
hToll, CD284 antigen

BACKGROUND

Toll-like receptors (TLRs) are signaling molecules that recognize different microbial products during infection and serve as an important link between the innate and adaptive immune responses (1-3). These proteins act through adaptor molecules such as MyD88 and TIRAP to activate various kinases and transcription factors such as Protein Kinase C (PKC) α/β and NF-κB (4-6). Studies with TLR4-deficient mice indicate that the main ligand for TLR is lipopolysaccharide. Consequently, these mice also showed increased susceptibility to Gram-negative sepsis (7).

ORDERING INFORMATION

CATALOG NUMBER

X1812P

SIZE

100 μ g

FORM

Unconjugated

HOST/CLONE

Rabbit

FORMULATION

Provided as solution in phosphate buffered saline with 0.02% sodium azide

CONCENTRATION

See vial for concentration

ISOTYPE

IgG

APPLICATIONS

Western Blot, Immunohistochemistry, Immunofluorescence, Immunocytochemistry (Paraffin)

SPECIES REACTIVITY

Human

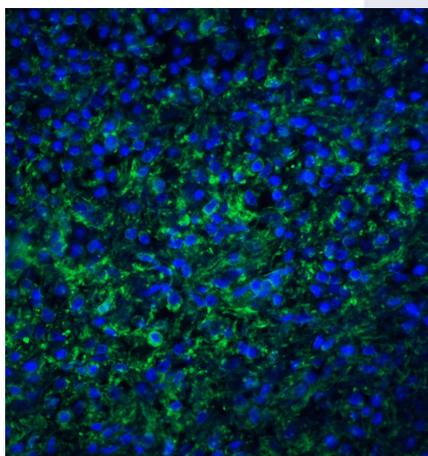

ACCESSION NUMBER

Human O00206

IMMUNOGEN

Rabbit polyclonal TLR4 antibody was raised against a peptide corresponding to 15 amino acids near the amino-terminus of human TLR4.

Immunofluorescence of TLR4 in human spleen tissue section using TLR4 antibody at 20 μ g/ml.

POSITIVE CONTROL/TISSUE EXPRESSION

Located in the membrane and highly expressed in placenta, spleen and peripheral blood leukocytes. Detected in monocytes, macrophages, dendritic cells and several types of T-cells⁸

COMMENTS

TLR4 antibody can be used for detection of TLR4 by Western blot at 2 to 5 ug/ml, immunohistochemistry (2-3 µg/ml), immunofluorescence (20 µg/ml) and immunocytochemistry (2-3 µg/ml).

PURIFICATION

Antigen Immunoaffinity Purification

SHIP CONDITIONS

Ship at ambient temperature, freeze upon arrival

STORAGE CUSTOMER

Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles

STABILITY

Products are stable for one year from purchase when stored properly
