LNx2 Blocking Peptide

BACKGROUND

Interacts with the phosphotyrosine interaction domain of Numb. Lnx proteins may serve as molecular scaffolds that localize unrelated, interacting proteins, such as Numb, to specific subcellular sites. Forms oligomers via their PDZ binding domains to PDZ-binding consensus motifs located in their C-termini or by homophilic oligomerization of their RING fingers.

ORDERING INFORMATION

CATALOG NUMBER
X2346B

SIZE
50 μ g

CUSTOMER STORAGE
Product should be stored at -20°C.
Aliquot to avoid freeze/thaw cycles

FORMULATION
Provided as solution in phosphate buffered saline

SHIP CONDITIONS
Ship at ambient temperature, freeze upon arrival

STABILITY
Products are stable for one year from purchase when stored properly

COMMENTS

For use with LNx2 polyclonal antibodies (Cat. No. X2317P & X2345P).

INSTRUCTIONS

Incubate antibody neat with at least a 50 fold stoichiometric excess of blocking peptide at 37 deg C for 20 minutes (molecular weights of peptide and antibody are ~2.5 kDa and ~160 kDa, respectively). Antibody can then be diluted to a concentration suitable for Western blot.

Example: 10 μ l or 10 μ g of Exalpa's rabbit anti-LNx2 (Cat. No. X2345P) is added to 10 μ g of blocking peptide for a total volume of 20 μ l. The mixture is allowed to incubate for 20 minutes at 37 deg C prior to dilution in suitable buffer (for Western blot, etc.).
