Sphingomyelin Phosphodiesterase 3. Rabbit Polyclonal Antibody

nSMase2; Neutral sphingomyelinase 2; EC 3.1.4.12

BACKGROUND

Sphingomyelin phosphodiesterase 3 catalyzes the hydrolysis of sphingomyelin to form ceramide and phosphocholine. Ceramide mediates numerous cellular functions, such as apoptosis and growth arrest, and is capable of regulating these two cellular events independently. It also hydrolyzes sphingosylphosphocholine. Sphingomyelin phosphodiesterase 3 regulates the cell cycle by acting as a growth suppressor in confluent cells. It likely acts as a regulator of postnatal development and participates in bone and dentin mineralization. It is activated by unsaturated fatty acids and phosphatidylserine. It is predominantly expressed in the brain.

ORDERING INFORMATION

CATALOG NUMBER
X2360P

SIZE
100 μ g

FORM
Unconjugated

HOST/CLONE
Rabbit

FORMULATION
Provided as solution in phosphate buffered saline with 0.08% sodium azide

CONCENTRATION
See vial for concentration

ISOTYPE

APPLICATIONS
Western blot

SPECIES REACTIVITY
Human

ACCESSION NUMBER
Human Q53YV1

IMMUNOGEN

Synthetic peptide derived from human sphingomyelin phosphodiesterase 3

Western blot using nSMase2 antibody (Cat. No. X2360P) on human brain lysate (Cat. No. X1633C). Lysate used at 14 μ g/lane. Antibody used at 10 μ g/ml. Secondary antibody, mouse anti-rabbit HRP (Cat. No. X1207M), used at 1:50k dilution.

POSITIVE CONTROL/TISSUE EXPRESSION

Predominantly expressed in the brain.

COMMENTS

Antibody can be used for Western blotting (1-5 μ g/ml starting dilution). Optimal concentration should be evaluated by serial dilutions.

PURIFICATION

Ammonium Sulfate Precipitation

SHIP CONDITIONS

Ship at ambient temperature, freeze upon arrival

STORAGE CUSTOMER

Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles

STABILITY

Products are stable for one year from purchase when stored properly
