Source

Chickens were immunized with highly purified bovine IgG isolated from normal pooled bovine serum. After multiple immunizations in Freund's adjuvant, eggs were collected and the IgY fraction prepared. The antibodies were immunoaffinity purified from a solid phase immunoabsorbant and conjugated to N-hydroxysuccinimide (NHS)-activated agarose beads. Beads were washed extensively after the blocking of the residual NHS sites.

Product

Gel; 1.0 ml bed volume

Product Form: Immunoprecipitation Gel

Formulation: Phosphate buffered saline, pH 7.2 with 0.075% sodium azide

Purification Method: Egg-yolk derived IgY Affinity Purified

Concentration: N/A

Applications

The specific activity of the anti-BIG agarose was determined. For this lot, 1 mg bovine IgG bound per ml agarose.

Storage

Product should be stored at 4-8°C. DO NOT FREEZE

Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. It may contain hazardous ingredients. Please refer to the Safety Data Sheets (SDS) for additional

information and proper handling procedures. Dispose product remainders according to local regulations. This datasheet is as accurate as reasonably achievable, but Exalpha Biologicals accepts no liability for any inaccuracies or omissions in this information.
