## Chicken anti Clostridium difficile Glutamate Dehydrogenase (GDH)

[exalpha.com/products/chicken-anti-clostridium-difficile-glutamate-dehydrogenase-gdh/ACdGDH](https://www.exalpha.com/products/chicken-anti-clostridium-difficile-glutamate-dehydrogenase-gdh/ACdGDH)

Catalog number: **ACdGDH**

Product Type	Primary antibodies
Units	0.1 mg
Host	Chicken
Application	ELISA Western Blotting

### Source

Chickens were immunized with highly purified Glutamate Dehydrogenase, purified from Clostridium difficile. After multiple immunizations in Freund's adjuvant, eggs were collected and the IgY purified. Anti-Clostridium difficile Glutamate Dehydrogenase was immunoaffinity purified using the immunogen immobilized on a solid support.

### Product

*Product Form:* Affinity purified

*Formulation:* Phosphate buffered saline, pH 7.2 with 0.075% sodium azide

*Purification Method:* Egg-yolk derived IgY Affinity Purified

*Concentration:* See vial for concentration.

### Applications

The anti-Clostridium difficile GDH antibody in a Western blot at a dilution of 1:5000 effectively probed 0.1 ug of the Glutamate Dehydrogenase. For direct ELISA, a dilution of 1:17,000 is recommended. Optimal working dilutions should be determined for your particular assay conditions.

### Storage

Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles.

### Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. It may

contain hazardous ingredients. Please refer to the Safety Data Sheets (SDS) for additional information and proper handling procedures. Dispose product remainders according to local regulations. This datasheet is as accurate as reasonably achievable, but Exalpha Biologicals accepts no liability for any inaccuracies or omissions in this information.
