# UEA I Lectin

**Cat No. GTX01510**

**Application** Conjugation, Puri

**Package**  
1 mg

## PRODUCT

### Product Description

The anti-H (O) hemagglutinating activity of *Ulex europaeus* has been used widely to confirm blood group O activity. UEA I binds to many glycoproteins and glycolipids containing  $\alpha$ -linked fucose residue. The purified lectin appears to be a dimer of two distinct polypeptide chains associated by noncovalent forces. This lectin does not react with Lea active blood group substance. The native protein has  $pI=6.0-6.1$  and exhibits a Molecular weight 60,000-68,000 during gel filtration on Sephadex column.
