Enterovirus D68 VP1 protein, His tag

Cat. No. GTX138561-pro

Application	WB, Lateral Flow
Species	Enterovirus D68

Package
100 µg

PRODUCT

Summary

Viral envelope protein 1 (VP1) of Enterovirus D68 (EV-D68) is one of four structural proteins required to assemble the icosahedral viral capsid. VP1 is responsible for host cell attachment and viral entry into host cells. In addition, since it is located on the surface of the virion and presents serotype-specific neutralization epitopes, the gene coding for VP1 is important for serotype identification. This E. coli-expressed recombinant EV-D68 VP1 protein is purified using its N-terminal His tag.

GTX138561-pro WB Image

Enterovirus D68 VP1 protein, His tag (10 ng, GTX138561-pro) was separated by 12% SDS-PAGE, and the membrane was blotted with Enterovirus D68 VP1 antibody [HL1997] (GTX637898) diluted at 1:5000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.
