11-Dehydro-thromboxane B2-¹³C₅

Cat. No.:	HY-113420S2
Molecular Formula:	C ₁₅ ¹³ C ₅ H ₃₂ O ₆
Molecular Weight:	373.43
Target:	Endogenous Metabolite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	11-Dehydro-thromboxane B2- ¹³ C ₅ is ¹³ C labeled 11-Dehydro-thromboxane B2 (HY-113420). 11-Dehydro-thromboxane B2 is a platelet hemagglutinin. Thromboxane inhibition was assessed by urinary excretion levels of 11-Dehydro-thromboxane B2. 11-Dehydro-thromboxane B2 can be used in the study of atherosclerotic thrombosis ^{[1][2]} .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
