Human γ -Thrombin

Cat. No.:	HY-114164B
CAS No.:	9002-04-4
Molecular Weight:	12000
Target:	Thrombin
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

Human γ -Thrombin

BIOLOGICAL ACTIVITY

Description

Human γ -Thrombin (Human Gamma Thrombin) is a variant of an enzyme that is further hydrolyzed from Thrombin. Human γ -Thrombin is produced by the hydrolysis of α -thrombin by factor X (fXa) or other plasma proteases such as hydrolases and plasmin, and can selectively activate platelets through specific receptors. Human γ -Thrombin can be used in the research of antithrombotic drugs^[1].
