### BIOLOGICAL ACTIVITY

<b>Description</b>	RH-5849 is an orally active agonist for non-steroidal ecdysteroid, which inhibits the larval growth of <i>Plodia interpunctella</i> in a dose-dependent manner. RH-5849 exhibits molting hormone activity <sup>[1]</sup> .
<b>In Vitro</b>	RH-5849 (0-100 μM, 3 days) inhibits proliferation of IAL-PID2 cells in a dose-dependent manner <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
<b>In Vivo</b>	RH-5849 (0-50 ppm, po for 17 days) induces molts and cuticle formation by wing discs, inhibits larval growth and results in death in a dose-dependent manner in <i>Plodia interpunctella</i> model <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
