NSCLC-IN-1

Cat. No.:	HY-161388
Molecular Formula:	C ₄₆ H ₅₆ N ₂ O ₁₃
Molecular Weight:	844.94
Target:	Ferroptosis; Mitophagy
Pathway:	Apoptosis; Autophagy
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

NSCLC-IN-1 (Compound A10-2) induces mitophagy and ferroptosis through targeting transmembrane BAX inhibitor motif containing 6 (TMBIM6). NSCLC-IN-1 induces mitochondrial Ca²⁺ imbalance, leading to mitochondrial damage. NSCLC-IN-1 reduces intracellular glutathione (GSH), increases the accumulation of lipid peroxides (LPO) and malondialdehyde (MDA) content. NSCLC-IN-1 is a potent anti-NSCLC agent^[1].
