SAH-¹³C₁₀

Cat. No.:	HY-19528S2
CAS No.:	2687960-02-5
Molecular Formula:	C ₄ ¹³ C ₁₀ H ₂₀ N ₆ O ₅ S
Molecular Weight:	394.34
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	4°C, sealed storage, away from moisture and light * In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture and light)

BIOLOGICAL ACTIVITY

Description	SAH- ¹³ C ₁₀ is the ¹³ C labeled SAH[1]. SAH (S-Adenosylhomocysteine) is an amino acid derivative and a modulator in several metabolic pathways. It is an intermediate in the synthesis of cysteine and adenosine[2]. SAH is an inhibitor for METTL3-METTL14 heterodimer complex (METTL3-14) with an IC ₅₀ of 0.9 μM[3].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
