### BIOLOGICAL ACTIVITY

#### Description

2,4-Dibromothiazole is a biochemical reagent that can be used as a biological material or organic compound for life science related research.

#### In Vitro

2,4-Dibromothiazole is applied as a building block in a synthesis of Melithiazole C employing a highly (E)-selective cross-metathesis between the derived 4-vinylthiazole and a dienote side-chain. It is also used as an intermediate in the preparation of various 2,4-disubstituted thiazole derivatives with biologically active properties such as survival motor neuron (SMN) protein modulators.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
