## Doxapram-d<sub>8</sub>

<b>Cat. No.:</b>	HY-B0551S
<b>Molecular Formula:</b>	C <sub>24</sub> H <sub>22</sub> D <sub>8</sub> N <sub>2</sub> O <sub>2</sub>
<b>Molecular Weight:</b>	386.56
<b>Target:</b>	Potassium Channel; Isotope-Labeled Compounds
<b>Pathway:</b>	Membrane Transporter/Ion Channel; Others
<b>Storage:</b>	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Doxapram-d <sub>8</sub> is deuterated labeled Doxapram (HY-B0551). Doxapram inhibits TASK-1, TASK-3 and TASK-1/TASK-3 heterodimer channels with EC <sub>50</sub> s of 410 nM, 37 μM and 9 μM, respectively.
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
