Levocarnitine propionate-d₃ hydrochloride

Cat. No.:	HY-B0932S
CAS No.:	1334532-19-2
Molecular Formula:	C ₁₀ H ₁₇ D ₃ ClNO ₄
Molecular Weight:	256.74
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	4°C, sealed storage, away from moisture * In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture)

BIOLOGICAL ACTIVITY

Description	Levocarnitine propionate-d ₃ (hydrochloride) is the deuterium labeled Levocarnitine propionate hydrochloride. Levocarnitine propionate hydrochloride (L-Propionylcarnitine chloride; ST-261) is used to treat the deterioration of renal function, congestive heart failure, intermittent claudication, and other diseases.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
