Perindoprilat

Cat. No.:	HY-B1433
CAS No.:	95153-31-4
Molecular Formula:	C ₁₇ H ₂₈ N ₂ O ₅
Molecular Weight:	340.41
Target:	Angiotensin-converting Enzyme (ACE)
Pathway:	Metabolic Enzyme/Protease
Storage:	4°C, protect from light * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light)

SOLVENT & SOLUBILITY

In Vitro

H₂O : 250 mg/mL (734.41 mM; Need ultrasonic)
DMSO : 100 mg/mL (293.76 mM; ultrasonic and warming and heat to 60°C)

Preparing Stock Solutions	Solvent Concentration	Mass	1 mg	5 mg	10 mg
		Concentration	1 mg	5 mg	10 mg
	1 mM		2.9376 mL	14.6882 mL	29.3763 mL
	5 mM		0.5875 mL	2.9376 mL	5.8753 mL
	10 mM		0.2938 mL	1.4688 mL	2.9376 mL

Please refer to the solubility information to select the appropriate solvent.

BIOLOGICAL ACTIVITY

Description

Perindoprilat (S 9780) is an angiotensin-converting enzyme (ACE) inhibitor with the IC₅₀ value ranging from 1.5 to 3.2 nM. Perindoprilat can be used in hypertension research^{[1][2]}.

In Vitro

Perindoprilat (1 μM, 10 days) treatment suppresses the angiotensin II production in HNSCC cells^[2]. Perindoprilat (40 μM, 3 days) treatment attenuates mesangial cell fibronectin level^[3].

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Cell Viability Assay^[2]

Cell Line:	HNSCC cells
Concentration:	1 μM
Incubation Time:	10 days
Result:	Suppressed the angiotensin II production in HNSCC cells (P=0.028).
