PbS/CdS QDs

Cat. No.:	HY-D1391
Target:	Fluorescent Dye
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

PbS/CdS QDs

BIOLOGICAL ACTIVITY

Description	PbS/CdS QDs (PbS/CdSe QD) is a fluorescent probe that can be used for in vivo fluorescence imaging in the second near-infrared window ^{[1][2]} .
In Vivo	The 2nd-NIR fluorescence imaging at ca.1300 nm using the PbS/CdS QDs results in the highest signal to background ratio with a low blurring for in vivo imaging ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
