### BIOLOGICAL ACTIVITY

<b>Description</b>	Cytosine-2,4- <sup>13</sup> C <sub>2</sub> -1,3- <sup>15</sup> N <sub>2</sub> is the <sup>13</sup> C-labeled and <sup>15</sup> N-labeled Cytosine. Cytosine is one of the four main bases found in DNA and RNA. Cytosine modifications exhibit circadian oscillations that are involved in epigenetic diversity and aging <sup>[1][2]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
