Maackia amurensis Lectin (MAA/MAL II)

Cat. No.:	HY-N12931	
Target:	Fluorescent Dye	
Pathway:	Others	
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.	Maackia amurensis Lectin (MAA/MAL II)

BIOLOGICAL ACTIVITY

Description

Maackia amurensis Lectin (MAA/MAL II) is a plant lectin. Maackia amurensis Lectin (MAA/MAL II) has specific sugar recognition properties and is able to bind to molecules containing specific sugar structures, especially the α -2, 3-linked Lactaminic acid (HY-I0400), which can be used as a probe to specifically bind biomolecular molecules. Maackia amurensis Lectin (MAA/MAL II) can be used for the discovery of disease-related biomarkers and the study of cancer pathologic mechanisms^[1].
