(-)-Fucose-¹³C-1

Cat. No.:	HY-N1480S1
CAS No.:	83379-37-7
Molecular Formula:	C ₅ ¹³ CH ₁₂ O ₅
Molecular Weight:	165.15
Target:	Endogenous Metabolite; Parasite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Anti-infection; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	(-)-Fucose- ¹³ C-1 is the ¹³ C labeled (-)-Fucose. (-)-Fucose is classified as a member of the hexoses, plays a role in A and B blood group antigen substructure determination, selectin-mediated leukocyte-endothelial adhesion, and host-microbe interacti[
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
