### BIOLOGICAL ACTIVITY

<b>Description</b>	Aflatoxin G1- <sup>13</sup> C <sub>17</sub> is the <sup>13</sup> C labeled Aflatoxin G1 (HY-N6697) <sup>[1]</sup> . Aflatoxin G1 is one type of aflatoxins occurring in nature. It is produced by molds, such as <i>Aspergillus flavus</i> and <i>Aspergillus parasiticus</i> . Aflatoxins are hepatogenic, teratogenic, immunosuppressive, and carcinogenic fungal metabolites found in feeds, nuts, wine-grapes, spices, and other grain crops <sup>[2][3]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
