

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!  
See the following pages for more information!

### Lieferung & Zahlungsart

siehe unsere [Liefer- und Versandbedingungen](#)

### Zuschläge

- Mindermengenzuschlag
- Trockeneiszuschlag
- Gefahrgutzuschlag
- Expressversand

### SZABO-SCANDIC HandelsgmbH

Quellenstraße 110, A-1100 Wien

## Methyl Eugenol-<sup>13</sup>C,<sub>3</sub>D<sub>3</sub>

|                           |                                                                                           |
|---------------------------|-------------------------------------------------------------------------------------------|
| <b>Cat. No.:</b>          | HY-N6996S                                                                                 |
| <b>Molecular Formula:</b> | C <sub>10</sub> <sup>13</sup> CH <sub>11</sub> D <sub>3</sub> O <sub>2</sub>              |
| <b>Molecular Weight:</b>  | 182.24                                                                                    |
| <b>Target:</b>            | Isotope-Labeled Compounds                                                                 |
| <b>Pathway:</b>           | Others                                                                                    |
| <b>Storage:</b>           | Please store the product under the recommended conditions in the Certificate of Analysis. |

### BIOLOGICAL ACTIVITY

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b> | Methyl Eugenol- <sup>13</sup> C, <sub>3</sub> D <sub>3</sub> is the <sup>13</sup> C- and deuterium labeled Methyl Eugenol. Methyl Eugenol, a phenylpropanoid chemical in leaves, fruits, stems, and/or roots, may be released when that corresponding part of a plant is damaged as a result of feeding by an herbivore. Methyl Eugenol is used for male annihilation of the oriental fruit fly[1].                             |
| <b>In Vitro</b>    | Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[57]</sup> .<br>MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
