### BIOLOGICAL ACTIVITY

<b>Description</b>	Quinic acid, purified from Eucalyptus globulus, cinchona bark, and other plant products, is the most abundant organic acid <sup>[1]</sup> .
<b>In Vitro</b>	Quinic acid is the most abundant organic acid, representing up to 86.3% (average value) of all organic acids. Quinic acid acts as an astringent and starting material for the synthesis of new pharmaceuticals <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
