### BIOLOGICAL ACTIVITY

Description	Fetuin, Fetal Bovine Serum is a liver-secreted 64 kDa plasma glycoprotein isolated from fetal bovine serum. Fetuin, Fetal Bovine Serum inhibits trypsin activity and promote cellular attachment, growth, and differentiation <sup>[1][2]</sup> .
In Vitro	Fetuin, Fetal Bovine Serum is often an important supplement to many serum-free media <sup>[2]</sup> . ?Fetuin is an acidic glycoprotein with three N-linked and three O-linked oligosaccharide chains, whose terminal sugar residues are rich in sialic acid (N-acetylneuraminic acid), contributing to its net negative charge <sup>[3]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
