

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!

## Xanthine oxidase, bovine milk

Cat. No.:	HY-P2755A	
CAS No.:	9002-17-9	
Target:	Reactive Oxygen Species	
Pathway:	Immunology/Inflammation; Metabolic Enzyme/Protease; NF-κB	Xanthine oxidase, bovine milk
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.	

### BIOLOGICAL ACTIVITY

Description	Xanthine oxidase, bovine milk is a xanthine oxidoreductase enzyme that generates reactive oxygen species (ROS), catalyzes the oxidation of hypoxanthine to xanthine, and further catalyzes the oxidation of xanthine to uric acid <sup>[1]</sup> .
In Vitro	Xanthine oxidase rapidly and completely depletes hypoxanthine in human erythrocytes <sup>[2]</sup> . Xanthine oxidase (20 mU/mL, 72 h) inhibits the growth of Plasmodium falciparum in human erythrocytes <sup>[2]</sup> . Xanthine oxidase (0.02 U/mL, 6 h) reduces the viability of postnatal cerebellar granule neurons obtained from 8-day old Sprague-Dawley rat pups <sup>[3]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
